**PRCD-S+**  
The crucial **PLUS** in safety!

Craftsmen very often have to connect their electrical devices to outlets (feeding points), where their function and safety is unknown. Serious accidents may result.

**PCE's new PRCD-S+ protects the user against incorrect electrical installations.**

## Advantages and functions

The new PRCD-S+ from PCE recognizes measurement errors (e.g. the wear of a glove) and does not switch on!

Further advantages and functions:

- Fully automatic routine check to test the safe condition of the socket outlet.
- Switching off L and N conductor in certain failure situations (PE conductor remains closed)
- PE conductor circuit is switched on in advance and switched off with a delay.
- Overvoltage protection
- Undervoltage protection
- Optical warning (LED)
- System error recognition
- handy - light - convenient
